**WARNING: THIS EQUIPMENT GENERATES, USES, AND CAN RADIATE RADIO FREQUENCY ENERGY AND IF NOT INSTALLED AND USED IN ACCORDANCE WITH THE INSTRUCTION MANUAL, MAY CAUSE INTERFERENCE TO RADIO COMMUNICATIONS. AS TEMPORARILY PERMITTED BY REGULATION IT HAS NOT BEEN TESTED FOR COMPLIANCE WITH THE LIMITS FOR CLASS A COMPUTING DEVICES PURSUANT TO SUBPART J OF PART 15 OF FCC RULES, WHICH ARE DESIGNED TO PROVIDE REASONABLE PROTECTION AGAINST SUCH INTERFERENCE. OPERATION OF THIS EQUIPMENT IN A RESIDENTIAL AREA IS LIKELY TO CAUSE INTERFERENCE IN WHICH CASE THE USER AT HIS OWN EXPENSE WILL BE REQUIRED TO TAKE WHATEVER MEASURES MAY BE REQUIRED TO CORRECT THE INTERFERENCE.**

## I. INSTALLATION

### Assemble the game as follows:

Bolt legs to cabinet. Using flat washers under bolt heads, bolt back box to cabinet. Feed cable connectors and ground braid through cable port in back box. Screw ground braid to braid in back box. Insert connectors so they are completely seated on printed circuit board assemblies.

On all games there are some items that must be checked after shipment. Making these visual inspections may avoid time consuming service work later. Minor troubles caused by abusive handling in shipment are unavoidable. Cable connectors may be loosened, switches (especially tilt switches) may go out of adjustment. Plumb bob tilt switches should always be adjusted after game is set on location and leg levelers are adjusted.

### Visual inspections before plugging in line cord:

1. Check wiring of transformer to correspond to location voltage.
2. Check the transformer for any foreign material shorting across wiring lugs.
3. Check that fuses are firmly seated and making good contact.
4. Check wire on coils for proper soldering. Cold solder connections may not show up in factory inspection, but vibration in shipment may break contact.
5. Check switches for loose solder or other foreign material that may have come loose in shipment and could cause shorting of contacts.
6. Check for any wires that may have become disconnected.
7. Check that all cable connectors are completely seated on printed circuit board assemblies.
8. Check that cables are clear of all moving parts.

### Check adjustment of the two (normally open) tilt switches:

1. Plumb bob tilt on left side of cabinet near front door.
2. Ball tilt above plumb bob tilt. Insert the smaller ball (gold 15/16" dia.) into ball tilt assembly, and adjust the bracket so the ball will roll free to contact the switch blade, if front of cabinet is raised.

### NOTE

TO PROTECT SOLID STATE COMPONENTS  
BEFORE TOUCHING ANY COMPONENT IN THE  
BACK BOX, DISCHARGE ANY POSSIBLE STATIC  
BUILD-UP BY TOUCHING ANY GROUND  
CIRCUIT, e.g. SIDE ARMOR, GROUND BRAID.

## II. ROUTINE MAINTENANCE ON LOCATION

Self tests, which are programmed into the design of the game, are very helpful. As with any solid state piece of equipment the three prong grounding receptacle is an important piece part of the game, that must not be tampered with and must be used properly.

### MPU MODULE SELF-TEST:

During power-up, the MPU assembly tests itself, which can visibly be seen by the flashing of a LED on the board. When the game is turned on, the LED will flash, have a pause, flash again, a longer pause, then flash five more times and then will be dimly lit. Accompanying each flash is one note (total of seven), this indicates proper MPU game operation conditions.

### GAME SELF-DIAGNOSTIC TESTS:

Pressing the Self-Test button inside the coin door activates the game into its "Self-Diagnostic Test."

1. BURN IN TEST - All outputs tested.
2. FEATURE LAMPS - All feature lamps will flash on and off continuously, determining any burnt lamps.
3. DISPLAYS - Each digit on all displays will cycle from 0 thru 9, then a number 8 will shift left to right. This test will recycle continuously.
4. SOLENOIDS - Each solenoid will be energized, one at a time, in a continuous sequence. (Holding both flipper buttons "in" during this test will cause the flipper coils to be energized). The number appearing on the "Player Score" display is the same as the number assigned to the solenoid and also the same transistor number on the SDB-board. The sound of a solenoid pulling-in as a number appears indicates proper operation (providing transistor is being used), the absence of a solenoid sound shows a fault. If sound is absent, see Solenoid I.D. page in book for help in Solenoid Identification. (After the solenoids are tested, the game sounds are tested).
5. SWITCHES - The MPU will look at each switch assembly for stuck contacts. \*(Flipper Button and flipper End of Stroke switches are not included). If there are any stuck, the lowest number encountered is flashed on the Player Score displays. The number remains until the fault is corrected. See Switch I.D. page in book for help in switch identification. Other numbers may follow if more stuck contacts are present. If there are no stuck switches, the "March/Ball in Play" display flashes '0'. **DO NOT BURNISH OR FILE GOLD PLATED SWITCH CONTACTS.**
6. GAME LEVELS AND BOOKKEEPING FUNCTIONS: - Pressing the Self-Test button eighteen more times causes the MPU to step thru the game levels and bookkeeping functions and finally to repeat the power-up test. To bypass these functions, turn the game off, then on. The game is now ready to play, after the MPU Self-Test.

## CONTACT SWITCH ADJUSTMENTS

All contact switches should be adjusted to have a gap  $1/16$ " in the open position, and have  $.010$ " overtravel closed. All contact switches (except for flipper buttons & flipper end of stroke switches) are gold plated to resist corrosion and, **SHOULD NOT BE FILED OR BURNISHED**. If contacts have dirt or dust on them, a clean piece of paper should be used to clean them, by closing the contacts and wiping gently.

**FLIPPER BUTTON & FLIPPER SWITCHES ONLY.** Tarnish or pitted contacts can be corrected with a contact file followed by a burnishing tool. Severely pitted contact must be replaced as an assembly.

## PLAYFIELD

Stern playfields have a durable long life playing finish. Its life expectancy, as well as playing appeal can be greatly extended by periodic cleaning. Inspect and hand polish the ball with a clean cloth. A chipped ball must be replaced, as it will ruin the finish on the playfield. (DO NOT USE WATER IN LARGE QUANTITIES, HIGHLY CAUSTIC CLEANERS, ABRASIVE CLEANERS OR CLEANING PADS ON THE PLAYFIELD SURFACE).

# ELECTRONIC PIN BALL GAME

## DISPLAY DRIVER ASSEM'S:-

1ST, 2ND, 3RD & 4TH PLAYERS, CREDITS.

AND MATCH/BALL IN PLAY,

(SEE BACK-RACK GLASS FOR LOCATIONS)

FIGURE 1

DETAIL S1-S32  
MPU ASS'Y.

### III. GENERAL GAME OPERATION

#### PLACE BALL INTO PLAYFIELD BY OUTHOLE:

COIN GAME. Coin should be rejected. Plug in line cord. (For proper game operation grounding circuit must be used). Move power On-Off toggle switch at bottom right front corner of cabinet to "ON" position. Seven singular tones will be heard to indicate game-readiness.<sup>1</sup> Feature lights will flash in a programmed abstract mode. "HIGH SCORE" light is lit, player displays flash high score to date. "HIGH SCORE" light goes off, previous played scores are flashed, and game is ready for play. Coin Game. The game should accept the coin and post credits for coins accepted (\*). Pressing the credit button on the door will reset drop targets and cause the outhole kicker to move the ball to the shooter lane. The first player display will flash CG.

One player is registered each time the credit button is pressed (one to four can play). The credits are reduced by one each time the credit button is pressed until the credits are reduced to zero. (Credit button is inoperative after 4 players are registered). Shooting the ball initiates play.

When the ball enters the outhole, the bonus score is added to the player's score. The player-up and/or ball in play on the back box is advanced one position. The bonus score starts at \*\* points. The outhole kicker moves the ball to the shooter lane and play is resumed. This continues until each player has played the allowable number of balls per game (3 or 5). At this time the "Game Over" light becomes lit. A random "Match" number appears and the "Match" light becomes lit. If the match number is the same as the last two digits in the player's score a free game can be awarded (\*).

Extra ball won during the course of the game is played immediately after the player's regular ball enters the out-hole. The player-up and/or ball in play is not advanced for extra ball play. Bonus score is added to the player's score. The bonus is reset to \*\* and the bonus multiplier earned is restored (memory) or reset (\*) before the game involves the extra ball for play.

At the end of the game, a "High Game" is flashed on all players scores. If the "High Game" is best, this feature(\*) can award up to 3 free games.

Tilting while playing the game results in loss of the ball in play. The flippers, thumper-bumper, etc., go "dead". Bonus score is not added. The purpose of the tilt penalty is to discourage the player from jostling the machine in an attempt to prolong play. Game action becomes normal after the outhole kicker moves the ball to the shooter lane.

Stamming the machine results in the loss of the game. All feature lights go out and the game becomes "dead" through a built-in time delay circuit. The purpose of the time delay circuit is to discourage abuse of the machine. After the delay, the "Game Over" light goes "Shout Again" light flashes and the game is ready for play. The time delay occurs anytime one of the stem switches is made to contact.

There is a stem switch on the front door, one on the tilt board. (Any number of stem switches could be installed by the operator, to meet his individual requirement). The switch should be adjusted to have approximately 1/16" gap between the contacts. The weighted blade should be adjusted to attain the desired sensitivity. Decreasing gap between contacts will make the switch more sensitive. Opening the gap will reduce sensitivity.

<sup>1</sup>Some tones and features can be disabled by operator if so desired.

<sup>\*\*</sup>Bonus starts at 0.

<sup>\*\*\*</sup>See back box adjustments. \*\*\*

<sup>†</sup>Golf walker and lane kicker cycles.

#### IV. SELF TEST AND BOOKKEEPING FUNCTIONS

The game is designed to help the operator perform certain diagnostic tests as well as accounting functions as follows:

##### IV. A. SELF TEST

TEST SWITCH PUSH NUMBER	BALL/MATCH DISPLAY	DESCRIPTION
1st		Burn in test - all outputs tested
2nd		Lamp test - all feature lamps on and off
3rd		Display test - All digits display 000000 thru 999999 then 8-B shifts from left to right
4th		Solenoid test - continuous sequence of solenoids pulsed with solenoid driver transistor. "O" number displayed
5th	Flashing 0 if all switches open	Switch test - switch I.D. No. displays if closed

##### IV. B. BOOKKEEPING FUNCTIONS

TEST SWITCH PUSH NUMBER	BALL/MATCH DISPLAY	DESCRIPTION	DISPLAYS
6th	01	1st Threshold (High Score)	00 to 40
7th	02	2nd Threshold (High Score)	00 to 899999
8th	03	3rd Threshold (High Score)	00 to 899999
9th	04	Current High Game Threshold	00 to 899999
10th	05	Current Credits	00 to 899999
11th	06	Total Plays	00 to 899999
12th	07	Total Replays	00 to 899999
13th	08	Total times high score is passed	00 to 899999
14th	09	Number of coins thru Chute No. 2	00 to 899999
15th	10	Number of coins thru Chute No. 1	00 to 899999
16th	11	Number of coins thru Chute No. 3	00 to 899999
17th	12	Total balls played	00 to 899999
18th	13	Total Extra Balls Awarded	00 to 899999
19th	14	Total Playfield Special Awards	00 to 899999
20th	15	N/U	00
21st	16	Total level 1 passed	00 to 899999
22nd	17	Total level 2 passed	00 to 899999
23rd	18	Total level 3 passed	00 to 899999

## V. FRONT DOOR GAME ADJUSTMENTS:

### HIGH SCORE FEATURE ADJUSTMENTS:

The game is designed to award a "Extra Ball" or "Free Game" (option) at three score levels. (See High Score Feature). The recommended levels are listed below.

Any level from 10,000 or 9,990,000 can be set, as desired. It is possible to reset or turn off (00) any or all of the levels, if desired.

1. Push and release Self-Test button at one second intervals six times until number '01' appears on the Match/Ball-In-Play display.
2. The number on the Player Score Displays is the first score level\*. It can be increased, if desired, by holding the credit button in. To decrease the score level, reset to '00', and then hold the credit button in. Release the credit button when the desired High Score appears. Note that the level changes 10,000 points at a time. If the number '00' is left on the displays, the high score feature is eliminated for that level.
3. Repeat steps 1 and 2 for the second and third high score levels. The number '02' and '03' on the Match/Ball-In-Play display are for the second and third levels, respectively.

### HIGH GAME TO DATE FEATURE:

The game is designed to award up to 3 free games (option) when "High Score to Date" is beat. For the recommended, factory preset level, see below.

It is recommended that the level, which will build with game play, be periodically reset to the factory recommended level to encourage game play. The adjustment procedure is the same as for the High Score Feature Adjustments, Steps 1 and 2. Continue pushing the Self-Test button until the number '04' appears on the Match/Ball-in-Play display and then do Step 2.

\*Any level from '00' to 9,990,000 can be set as described. It is to be noted that '00' does not turn off the feature, as it does on High Score feature. The feature can be turned off by positioning the correct MPU switches.

\*Can be quickly set to '00' by pressing S33 on the MPU assembly in the back box or front door.

### RECOMMENDED SETTING

	3 BALL	6 BALL
1st Level	500,000	980,000
2nd Level	940,000	2,200,000
3rd Level	-----	-----
High Score To Date	1,300,000	3,000,000

## VI. FEATURE OPERATION AND SCORING

To help explanation, playfield switches involved will be called out. See "Switch Identification" (Pg. 19) for location of playfield switches.

### BONUS SCORE FEATURE:

2000 score for each lit lite. One and only one completed card goes into reserve bonus.

### BONUS ADVANCEMENT:

Pl. Sw. No.	Location	Advance Bonus
	Center 3 Bank Targets	Lit Number Score 2000 times Multiplier
<b>BONUS MULTIPLIER:</b>		
Pl. Sw. No.	Location	Advance Multiplier
17, 18, 19, 20, 21	Left 5 Bank Targets	Increases Multiplier by 1x when all five targets hit (14x Max)
22, 23, 24	Center 3 Bank Targets	Increases Multiplier by 1x when all three targets hit (14x Max)
37 (2)	Oullanes	Increases Multiplier by 1x (14x Max)

Bonus Multiplier can be adjusted to reset after each ball. (See MPU SW #29)

### THREE BALL FEATURE:

When "Sky Divers" lites are lit in the ball kicker lane, SKY DIVER #1 and #2 lites are lit and the third ball goes into the ball walker—The three ball feature is active.

### SPECIAL:

Special can be awarded by means of three switches; two oullane switches (Pl. Sw. No. 37) and side special switch (Pl. Sw. No. 25).

### OUTLANE SPECIAL:

Lites when card is completed once or twice (See MPU Sw. #5) or when 3 ball feature is awarded first or second time (See MPU Sw. #23).

### ALTITUDE LANE SPECIAL:

Lites when left 5 bank targets are hit down in sequence.

### SPECIAL ADJUSTMENT:

"Special" can be adjusted so there is only one Special per game or one Special per ball. (See MPU Sw. No. 30)

### SPECIAL AWARD:

	MPU SW. NO.	
	31	32
NO AWARD	OFF	OFF
SHOOT AGAIN	OFF	ON
100,000	ON	OFF
REPLAY	ON	ON

**SHOOT AGAIN COLLECTED:**

"Shoot Again" can be awarded by means of the "SPECIAL" feature on game (See MPU Sw. No. 31 & 31).

**RIGHT SKY DIVERS LANE (Pl. Sw. No. 4)**

Score 45,000 and signals coil to kick ball out.

**SKY DIVER KICKER (Pl. Sw. No. 5)**

Score 15,000 and signals coil to kick ball out.

**OUTHOLE REFLEX (Pl. Sw. No. 6)**

When closed will advance the ball to the outhole runway section.

**OUTER RETURN LANES (Pl. Sw. No. 8)**

Score 3,000 and spots second "S"—other side.

**LOWER RIGHT REBOUND SWS. (Pl. Sw. No. 11)**

Score 10 points, changes lane selector and turns outline special line on and off when special has been awarded, by completing card or 3 ball feature (if both completed card and 3 ball feature is achieved—line will not turn on and off—it will stay on until awarded or game ends).

**RIGHT SLINGSHOT (Pl. Sw. No. 12)**

**LEFT SLINGSHOT (Pl. Sw. No. 13)**

Same as above lower right rebound sws.

**LEFT & RIGHT POP BUMPERS (Pl. Sw. No. 14 (r1) & No. 15 (r1))**

Score 1000, changes line selector, turns spinner and top right stand-up target line on and off.

**TOP POP BUMPER (Pl. Sw. No. 16)**

Score 1000 and changes line selector.

**5 BANK DROP TARGETS (Pl. Sw. No. 17, 18, 19, 20, 21)**

Each target scores 500. Targets hit down in sequence 1-2-3-4-5 scores extra 50,000 points, uses side lane special and increases bonus multiplier by one. Targets hit down out of sequence scores extra 10,000 points and increases bonus multiplier by one. If targets 1-2-4-5 are hit down leaving target #3 standing, the extra ball lines for that ball in play and if hit down would award extra ball plus out of sequence scoring.

**3 BANK DROP TARGETS (Pl. Sw. No. 22, 23, 24)**

Each target scores 1000 and lines number in III selector line (See MPU Sw. 22). Using all numbers with one ball stores "Completed Card" in "Reserve Bonus", plus can line up outline special (See MPU Sw. 5). Completed III lines score 5,000, are put in "Reserve Score" and are carried over from ball to ball.

**LEFT LANE STAND-UP TARGET (Pl. Sw. No. 25)**

Scores 10,000, lit value and special when lit.

**TOP RIGHT ROLL-OVER AND TOP RIGHT STAND-UP (Pl. Sw. No. 28)**

Scores 3,000 and litas letter "E" in "SKY DIVERS" lane.

**INNER TOP RIGHT ROLL-OVER (Pl. Sw. No. 27)**

Scores 5,000 and litas letter "V" in "SKY DIVERS" lane.

**INNER TOP LEFT ROLL-OVER (Pl. Sw. No. 28)**

Scores 5,000 and litas letter "I" in "SKY DIVERS" lane.

**TOP LEFT ROLL-OVER AND TOP LEFT STAND-UP TARGET (Pl. Sw. No. 29)**

Scores 3,000 and litas letter "D" in "SKY DIVERS" lane.

**MIDDLE RIGHT BOTTOM STAND-UP TARGET (Pl. Sw. No. 30)**

Scores 3,000 and litas letter "Y" in "SKY DIVERS" lane.

**MIDDLE RIGHT CENTER AND TOP CENTER STAND-UP TARGET (Pl. Sw. No. 31)**

Scores 5,000 and litas letter "K" in "SKY DIVERS" lane.

**MIDDLE RIGHT TOP STAND-UP TARGET (Pl. Sw. No. 32)**

Scores 3,000 and litas letter "S" in "SKY DIVERS" lane.

**CUTHOLE LANE SWITCHES (Pl. Sw. No. LT 35, Ctr. 34, Rt. 33)**

Ball count switches.

**Spinner and top right stand-up target (Pl. Sw. No. 36)**

Scores 500 or 5,000 when lit.

**OUTLANE SWITCHES (Pl. Sw. No. 37)**

Scores 15,000 and increases bonus multiplier by one and also awards special when lit.

**SHOOTER LANE (Pl. Sw. No. 38)**

Allows game to start if 2 balls are in cuthole and one in lane.

**BALL WALKER LANE (Pl. Sw. No. 39)**

Scores 20,000 and advances ball in walker.

**INNER RETURN LANES (Pl. Sw. No. 40)**

Scores 5,000 and litas letter "R" in "SKY DIVERS" lane.

## VII. CREDIT/COIN AND GAME ADJUSTMENTS

### A. Playfield Post Adjustments:

Posts that control left and right outlane openings on playfield can be moved to make access to outlanes conservative or liberal for ball to enter. (See Fig. 3).

Conservative entry will decrease playing time and scoring.

Liberal entry will increase playing time and scoring.

### B. Back Box Game Adjustments:

Each game has thirty-two switches located on the MPU module, located in the back box, that allows play to be customized to the location. (See Fig. 1). Credits per coin, maximum credits, credit display, balls (3 or 5) per game, match feature, high score feature, special award, maximum extra balls and background sound are selectable by means of switches. The switches are contained in four-sixteen lead packages numbered S1-S, S9-16, S17-24, and S25-32 for easy identification. The 'On' position is marked on the assembly. TURN OFF POWER BEFORE MAKING ADJUSTMENTS. MAKE ADJUSTMENTS BEFORE TURNING POWER BACK ON.

## CREDITS/COIN ADJUSTMENTS:

The credits given are selectable by means of MPU switches. Sixteen credit ratios are available. The MPU switch settings and resultant credits/coin are as follows:

### CREDITS/COIN ADJUSTMENTS SWITCHES

SWITCH No. 1 (BLU)	4	3	2	1		
SWITCH No. 2 (BRN-WHITE)	12	11	10	9		
SWITCH No. 3 (RED-WHITE)	26	27	28	29	CREDITS	COIN
OFF	OFF	OFF	OFF	1		
OFF	OFF	OFF	ON	2		
OFF	OFF	ON	OFF	3		
OFF	OFF	ON	ON	4		
OFF	ON	OFF	OFF	5		
OFF	ON	OFF	ON	6		
OFF	ON	ON	OFF	7		
OFF	ON	ON	ON	10		
ON	OFF	OFF	OFF	14		

				SEQUENCE OF CREDITS PER COIN			
				1	2	3	4
ON	OFF	OFF	ON	1	2	0	1
ON	OFF	ON	OFF	3	2	1	2
ON	OFF	ON	ON	5	2	0	5
ON	ON	OFF	OFF	7	2	0	7
ON	ON	OFF	ON	3	4	0	1
ON	ON	ON	OFF	5	4	1	1
ON	ON	ON	ON	7	4	1	3

If two or three coin chutes are adjusted the same for multiple coins, credits will increase as if dropped in same chute.  
Credit sequence will reset when:

- 1) credit button is pressed
- 2) any points are scored

**BALLS PER GAME:**

NO. OF BALLS PER GAME	MPU SWITCH 7
3	OFF
5	ON

**ADD-A-BALL (MEMORY):**

This adjustment can store in memory 3 or 5 "Add-A-Balls."

ADD-A-BALL (MEMORY)	MPU SWITCHES
1 Only	24 13 OFF OFF
3	ON OFF
5	ON ON

**CREDIT DISPLAY:**

CREDIT DISPLAY	MPU SWITCH 20
YES	ON
NO	OFF

**AWARDED MAXIMUM CREDITS:**

In answer to public demand, we at "STERN" are trying to give the players what they want — **MORE** playfield excitement. In order to do this, additional features are **NEEDED**.

In an effort to do so, we have added a coil on the playfield, and eliminated the "Coin Lock-Out Coil" (often called a nuisance by operators).

This Stern game has a new feature not used in any previous Stern pinball:

Coins will be accepted and credit given for the amount of coins inserted.

There are no MPU switches to limit the amount of credits given as in older Stern pinballs (it is even possible to attain 99 credits). There are, however, two (2) MPU switches that will limit the amount of replays awarded. These two switches can be set for a limit of 10, 15, 25, and 40 replays. If the amount of credits shown in the credit/match window is greater than the MPU switches are set for, no replay credit will be awarded.

AWARDED MAXIMUM CREDITS	MPU SWITCHES
10	18 19 OFF OFF
15	ON OFF
25	OFF ON
40	ON ON

**HIGH SCORE FEATURE:**

The game is designed to award an "Extra Ball" or "Free Game" at one, two or three "High Score" levels. (See "Front Door Game Adjustments" for setting levels.)

AWARD	MPU SWITCH 6
Extra Ball	OFF
Replay	ON

**HIGH GAME TO DATE FEATURE:**

The game is designed to award up to 3 free games when "High Score to Date" is beat. Each time this happens, the winning score becomes the new "High Game Score to Beat". This score is displayed on all 4 player score displays at the end of each game as an incentive to play.

<b>AWARD</b>	<b>MPU SWITCHES</b>	
	<b>15</b>	<b>16</b>
Novelty	OFF	OFF
1 Free Game .....	ON	OFF
2 Free Games	OFF	ON
3 Free Games .....	ON	ON

**BACKGROUND SOUND:**

The "Background Sound" during game play can be controlled as follows:

<b>SOUND</b>	<b>MPU SWITCH 8</b>
OFF	OFF
ON	ON

**TALKING FEATURE:**

The "Talking Feature" during game play can be controlled as follows:

<b>TALKING FEATURE</b>	<b>MPU SWITCH 17</b>
NO	OFF
YES	ON

**MATCH FEATURE:**

When the "Match Feature" is ON, a random tens digit number appears in the "Match/Ball In Play" window and the word "Match" is illuminated. If the number matches the ten digit in a player's score, a free game is awarded. The "Match Feature" creates an incentive to play.

<b>MATCH</b>	<b>MPU SWITCH 21</b>
ON	ON
OFF	OFF

**BONUS MULTIPLIER CARRY-OVER:**

The "Bonus Multiplier" awarded during the course of the game can be retained from ball to ball or can be adjusted to start at x1 for each ball.

<b>BONUS MULTIPLIER</b>	<b>MPU SWITCH 29</b>
RESET	OFF
RETAIN	ON

**NO. OF SPECIALS:**

The number of "Specials" awarded can be limited as follows:

<b>SPECIALS</b>	<b>MPU SWITCH 30</b>
1 PER BALL	OFF
1 PER GAME	ON

**SPECIAL AWARD:**

<b>SPECIAL AWARD</b>	<b>MPU SWITCHES</b>
NO AWARD.....	31. 32 OFF OFF
EXTRA BALL.....	OFF ON
100,000 POINTS.....	ON OFF
REPLAY.....	ON ON

**OUTLANE SPECIAL LITES, WHEN**

	<b>MPU SWITCHES</b>
1) COMPLETED CARD	5 23
1 LIT ONE TIME	ON
2 LIT TWO TIMES	OFF
2) 3 BALL FEATURE HAS BEEN COMPLETED	ON
1st TIME	OFF
2nd TIME	

**BALLS IN WALKER**

Anytime the game is TURNED ON, balls in the walker will return to the outhole. The balls left in the walker will remain there for the next game or player. MPU sw. 14 will determine if "SKY DIVER" lites 1 and/or 2 will be on and carried over or balls are left in the walker, lites off and have to be re-lit.

<b>SKY DIVER LITES</b>	<b>MPU SWITCH 14</b>
CARRY OVER	ON
RESET	OFF

**ARROW-CARD SELECTOR**

Number of arrows by card can be adjusted to have only one on or any two on 25% of the time.

<b>ARROWS ON</b>	<b>MPU SWITCH 22</b>
1 ARROW	OFF
2 ARROWS	ON
